## **Computer Services:**

**Computer Tune up** - Get your computer to operate at its highest potential.

**Diagnostic Troubleshooting & Repair** - If your computer is running slow, or you are having some sort of recurring problem such as an error message, or your internet connection acting up.

**Setting up a Home Network** - If you are looking to either setup a network for the first time (wired or wireless) or if you would like to upgrade your network.

**Backup your data** - If you want to backup your files on CD's or DVD's in case something happens to your computer.

**Protect Your Computer** - Let us help you create the most protected internet experience possible. We will cover everything from anti-virus software to pop up blocking to spam e-mail. (price does not include software)

## **Computer Upgrades:**

**Install Hard Drive** - Want more storage space? Either install a second hard drive or upgrade your current one to a bigger size

**Install Memory (RAM)** - Want your computer to perform a little faster? Upgrade your computer's RAM.

**Install a new drive** - Want to be able to burn DVD's on your computer? Have us install a new drive on your computer.

**Install other hardware** - Want a better graphics card? Need more USB or Firewire Ports? We can install many other types of hardware specific to your needs.

\*With all of the above Computer Upgrade services, we are able to provide you with where to find the best part for the upgrade for a very affordable price.

Due to the uniqueness of each client's request, please contact us with the above information.
